

## Connecting Remote Video for Centralized Retail Security Operations

The IONODES PERCEPT Gateway Solution, powered by our PERCEPT Cloud platform, offers a safe and scalable solution for retailers to centralize multi-location live and recorded video. This powerful combination helps create safer retail environments by enabling remote monitoring to address safety concerns for staff and customers, as well as potential asset damage or loss at sites with limited or no security resources.

For retail chains with multiple locations, the PERCEPT Gateway Solution offers centralized management of disparate video surveillance systems without the cost and complexity of replacing them. With supported integration into major VMS platforms, the solution provides secure, comprehensive monitoring and response capabilities, all within your designated corporate system.

### PERCEPT Gateway Solution

### Empowering Retailers and Their Security Operations

A secure, cost-effective, and easy-to-deploy solution that works with practically all ONVIF IP camera, enabling instant visibility into critical areas like shop floors, stockrooms, and POS terminals.

IMPROVE THE SAFETY AND SECURITY OF EMPLOYEES

GAIN REAL-TIME AWARENESS ACROSS LOCATIONS

IMPROVE OPERATIONS WITH VIDEO INSIGHTS

OPTIMIZE YOUR SECURITY BUDGET AND RESOURCES

EMPOWER LOSS PREVENTION TEAMS TO ENHANCE THEIR EFFECTIVENESS

STRENGTHEN CUSTOMER CONFIDENCE AND STORE REPUTATION

INTEGRATE SEAMLESSLY WITH EXISTING INFRASTRUCTURE

MINIMIZE THEFT, FRAUD AND SHOPLIFTING

## How It Works

It starts with the PERCEPT Gateway device, a small onsite edge appliance that seamlessly connects to local cameras in a few simple steps, without requiring an onsite IT specialist. Acting as a secure and encrypted gateway for live video, the PERCEPT Gateway keeps local recording of all connected cameras for a configurable period, enabling on-demand video retrieval.

Secure remote access to PERCEPT Gateway devices is provided by PERCEPT Cloud, a cloud-based device and video management platform that offers centralized management for any number of gateway devices and cameras. PERCEPT Cloud provides instant access to live and recorded video stored on-site through a simple, powerful web-based interface. No video is stored in the cloud.

The IONODES PERCEPT Gateway Solution also includes integration to major VMS platforms allowing you to access on-demand, live or recorded video from any camera, from any enrolled PERCEPT Gateway using an existing centralized VMS. Organizations with multiple sites can therefore unify disparate video surveillance systems under their enterprise VMS without replacing existing systems at remote locations, providing their security team with a single monitoring interface for all locations.

## What's Needed

The deployment of one or more PERCEPT Gateway devices is required at each retail location. These gateway devices are compatible with any ONVIF-compatible IP camera. If you don't currently have cameras installed at one or more stores, our team can help you select the right cameras to fit your needs.

The PERCEPT Gateway device is offered in two configurations to suit deployments of varying sizes. The model you choose depends on the number of cameras you would like to access from each remote location. The PERCEPT Gateway Solution includes everything needed for 3 years of operation, including a subscription to PERCEPT Cloud and an IoT LTE data plan for each gateway device. The built-in and pre-activated LTE connectivity enables remote management and configuration, also ensuring reliable video access even when onsite internet connectivity or bandwidth is limited.

The PERCEPT Gateway Solution can be used as a standalone solution, paired with PERCEPT Cloud to remotely access, view, and share live and recorded video, or it can be integrated into your preferred VMS if required.

### PERCEPT Gateway Devices

#### PERCEPT GW08

Manages up to  
8 cameras

#### PERCEPT GW32

Manages up to  
32 cameras

## How to Demo or Purchase

Visit [IONODES.com](http://IONODES.com) or contact our sales experts at [sales@ionodes.com](mailto:sales@ionodes.com) to learn more about how the PERCEPT Gateway Solution can transform and augment your retail security operations.

## Trusted Leader

IONODES pushes the boundaries of video technology, delivering innovative products that enhance people's lives while ensuring their safety and security. We help government, commercial and enterprise organizations, including Fortune 500 companies around the world, solve operational challenges by providing smart and connected IoT video solutions that can be easily integrated into existing workflows and business processes.
